

Today's Challenge

The surge in remote working has expanded the IT threat landscape. With the complexity of IT systems, this exponentially exposes organizations to catastrophic risk and lost end user productivity.

Most endpoint management tools fall short addressing these challenges due to:

- ✓ Lack of real-time understanding into what and where problems exist
- ✓ Agent-based managed endpoints that are offline or fail to communicate at any given time
- ✓ Inability to automate remediation
- ✓ Data without an associated, automated action
- ✓ Network overload, causing slow time-to-resolution

The Fastest, Most Scalable Solution

Adaptiva Endpoint Health automatically identifies and resolves any Windows configuration or vulnerability with unmatched speed, scale, and reach.

Extends visibility and control beyond your VPN to **encompass remote internet users**.

Instantly assesses and fixes issues of 100,000's of endpoints **without impacting the network or business traffic**.

Empowers IT to build and customize unique workflows **without writing a single line of code**.

Delivers **actionable insight into the true status** of every check, remediation, and endpoint.

Your Business Benefits

Visibility

Gain visibility into the true state of every endpoint and share that insight with dynamic, real-time reporting.

Performance

Keep endpoints healthy for an improved digital experience and user productivity.

Compliance

Achieve and easily validate compliance requirements for corporate standards and audits.

Cost Savings

Reduce IT labor costs and boost the bottom line.

Risk Mitigation / Security

Ensure business continuity by closing vulnerabilities for heightened security.

What Makes Adaptiva Different

Adaptiva's unique peer-to-peer (P2P) architecture delivers the fastest, most effective endpoint management experience.

Experience

Unprecedented speed and scale that you never thought possible.

Management

Control of remote endpoints with only an internet connection.

Optimized

Eliminates network pressure ensuring business traffic is unaffected.

Tools

Finger-tip controls and no-code authoring of proprietary workflows.

Reputation

Trusted partner of global leaders

Proven Success

Adaptiva customers **save \$ millions each year** in IT labor productivity, attain a more secure environment, and deliver a superior digital experience.

Global Bank

Millions of health checks run each day across 100,000's of global workstations and ATMs to assess and proactively repair security vulnerabilities

Top 5 Shipper

Automate remediations of over 80% of health check failures, eliminating hundreds of hours in labor each week and accelerating time-to-resolution.

Fortune 500 Retailer

Dramatically shortened repair times from months to days with no network impact, in spite of the wide deployment scope and large-file size of the patch.

Global Bank

Built over 125 custom health checks, without coding, to manage internally developed applications, greatly reducing non-compliance and security risk.

Start Today

Discover why so many Fortune 500 companies trust and depend on Adaptiva to manage endpoint performance, compliance, and security.
